

Jackson County

Estimated Economic Impact of Agriculture, Food, and Food Processing Sectors

10/7/14

10 agriculture, food, and food processing sectors were analyzed to determine their overall contribution to the Jackson County economy.¹

These 10 sectors have a total direct output of approximately \$146 million and support 1,188.4 jobs in Jackson County. Running the model for all 10 sectors simultaneously produces the following results:

Agriculture Contribution in Jackson Co						
Impact Type ²	Employment	% Employment	Total Value Added ³	% of Gross Regional Product ⁴	Output ⁵	% of Gross Regional Product
Direct Effect	1,188.4	14%	29,212,674.0	7%	145,594,080.5	35%
Indirect Effect	87.4	1%	7,630,692.0	2%	13,285,614.8	3%
Induced Effect	97.4	1%	6,575,548.7	2%	10,566,052.1	3%
Total Effect	1,373.2	16%	43,418,914.6	10%	169,445,747.4	41%

As shown in the above table, agriculture, food, and food processing supports 1,373.2 jobs, or 16% of the entire workforce in the county. These industries provide a total economic contribution of approximately \$169 million, roughly 41% of Gross Region Product (GRP). As noted below in the calculation of Gross Regional Product, imports and institutional sales are subtracted. Therefore, counties that import a relatively large amount of goods and services will have a reduced GRP which may lead to agricultural output being greater than GRP.

Another metric used to calculate the importance of sectors in an economy is their value added as a percentage of GRP. Total value added by the 10 agriculture, food, and food processing sectors is approximately \$43 million, or 10% of the GRP. This indicates that personal income, business income, and taxes generated by these sectors account for 10% of the total economy.

¹ Article on building a contribution analysis in IMPLAN that avoids double counting:

http://www.implan.com/index.php?option=com_content&view=article&id=660%3A660&catid=253%3AKB33&Itemid=70

² Direct, indirect, and induced effects sum together to estimate the total economic contribution in the state. **Direct effects** capture the contribution from agricultural and food products. **Indirect effects** capture the economic benefit from farms and agricultural businesses purchasing inputs from supporting industries within the state. **Induced effects** capture the benefits created when employees of farms, agricultural businesses, and the supporting industries spend their wages on goods and services within the state.

³ Value added = labor income + indirect business taxes + other property type income.

⁴ GRP = final demand of households + governments expenditures + capital + exports - imports - institutional sales.

⁵ Output = intermediate inputs + value added.

The following tables document the overall summary numbers of the model, top industries affected by employment and output, and a listing of all industries that were analyzed.

In the top ten by employment, Cattle ranching and farming is the top employer in the agriculture industry with 420.3 employees. This table also shows the amount of jobs that are created by the agriculture industry in Jackson County.

Description	Total Employment	Total Output
Cattle ranching and farming	420.3	45,352,905.5
Grain farming	362.5	14,521,198.8
Animal (except poultry) slaughtering, rendering, and processing	169.3	56,136,375.5
Oilseed farming	118.5	13,139,132.3
All other crop farming	41.5	10,427,930.1
Animal production, except cattle and poultry and eggs	38.8	1,355,706.9
Dairy cattle and milk production	30.1	4,198,355.4
Monetary authorities and depository credit intermediation activities	21.9	7,154,936.2
Food services and drinking places	16.5	879,107.8
Wholesale trade businesses	9.8	1,552,224.4

The Animal (except poultry) slaughtering, rendering, and processing industry directly contributes approximately \$56 million to Jackson County's economy. This table also shows how much revenue is generated in other industries by having a strong agriculture industry.

Description	Total Employment	Total Output
Animal (except poultry) slaughtering, rendering, and processing	169.3	56,136,375.5
Cattle ranching and farming	420.3	45,352,905.5
Grain farming	362.5	14,521,198.8
Oilseed farming	118.5	13,139,132.3
All other crop farming	41.5	10,427,930.1
Monetary authorities and depository credit intermediation activities	21.9	7,154,936.2
Dairy cattle and milk production	30.1	4,198,355.4
Imputed rental activity for owner-occupied dwellings	0.0	2,648,841.6
Wholesale trade businesses	9.8	1,552,224.4
Animal production, except cattle and poultry and eggs	38.8	1,355,706.9

Below is a summary of all agriculture data with employment levels and output level. These values can tell how many jobs are represented by each agriculture sector and the output they contributed to Jackson County's economy.

[illegible]

All 105 counties in Kansas have Implan models and agriculture contribution summary. These values do not factor in the retail environment of food sales. Food retail is important, but in order to provide the most accurate picture of what production agricultural and processing contributes to Kansas, the retail sector was omitted.
